DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a method of amplifying and quantifying target, classified in class 435, subclass 91.1.
 - II. Claims 6-14, drawn to a control nucleic acid, composition and kit, classified in class 536, subclass 23.1.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the control nucleic acid, composition comprising control nucleic acid and target and kit comprising the control nucleic acid, target nucleic acid and primers of invention II can be used in a materially different process such as in methods of purification or in methods of PCR mutagenesis or in method of genotyping or haplotyping.

3. Because these inventions are distinct for the reasons given above and the search required for any one Group is not required for any other Group, restriction for examination purposes as indicated is proper.

Art Unit: 1637

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
